Muhamad Hendri Febriansyah

Full-Stack Developer | Frontend-Focused, Backend-Capable
Mataram, West Nusa Tenggara, Indonesia

Summary

Front-end Developer | Android Developer | open to any remote opportunities abroad

Bachelor of Computer Science with over 6 years of experience in software development, covering both Web 2 and Web 3 technologies. Skilled in building web applications using Laravel (PHP), JavaScript, and React.js, with hands-on experience integrating systems with Google API, Midtrans, and Moota. Experienced in developing native Android applications using Java, Kotlin, and Android Jetpack. Proficient in building decentralized applications (dApps) and integrating Ethereum smart contracts (Solidity). Comfortable working in agile/SCRUM teams, delivering efficient, stable, and scalable solutions.

Experience

PT Lapantiga Solusi Algoritma

Software Developer
January 2019 - Present (7 years 10 months)
Surabaya, East Java, Indonesia

- Built and maintained web applications using Laravel and other technologies.
- Implemented features and functionality as specified by project requirements and user stories.
- Increased application stability and performance by optimizing code and implementing best practices.
- Developed a custom content management system (CMS) that streamlined content creation and management processes.
- Improved application security by implementing robust authentication and data validation measures.

KIPLEY.ai

Full Stack Developer
November 2024 - July 2025 (9 months)
Singapore

- Built and integrated APIs for 5+ KIPLEY projects, significantly improving frontend responsiveness and overall user experience by optimizing data flow and component rendering.
- Integrated Ethereum smart contracts (Solidity) with web3 frontend frameworks, enabling secure and seamless decentralized transactions for DeFi and NFT features.
- Developed a Telegram-based AI Assistant with multichain payment support (TON, USDT, Stars), enabling real-time user interaction and crypto-based transactions.
- Collaborated closely with product, design, and backend teams in an Agile environment to iterate on features, resolve technical blockers, and meet sprint deadlines consistently.

PT Aku Pintar Indonesia
Android Developer
February 2021 - May 2024 (3 years 4 months)
Jakarta, Indonesia

- Developed an Android-based online education application, achieving 1.5 million users and a 4.42 Play Store rating.
- Implemented a modular architecture, reducing app size by 38.6%, enhancing performance and user experience.
- Optimized application stability, maintaining a 99.42% crash-free user rate.
- Spearheaded the implementation of security features, enhancing the application’s data protection and compliance.
- Actively participated in bi-weekly standups and consistently met sprint deadlines, showcasing strong project management skills.

PT Qira Teknologi Indonesia.
Software Developer
November 2020 - January 2024 (3 years 3 months)
Surabaya, East Java, Indonesia

- Led the migration of legacy codebases to Laravel, resulting in a more maintainable and scalable codebase.
- Performed regular maintenance and optimization to ensure high application performance and reliability.
- Improved application load times by 30% through code optimization and efficient database querying.
- Successfully integrated third-party APIs, enhancing application functionality and user experience.

- Conducted code reviews and adhered to best practices for coding standards and documentation.

Indosat Ooredoo Hutchison Digital Camp
IDCamp 2019 Participant - Android Developer
December 2019 - April 2020 (5 months)
Indonesia

IDCamp is a scholarship program from Indosat Ooredoo Hutchison to produce young Indonesian developers/programmers who are ready to compete in the digital economy

PT Aku Pintar Indonesia
1 year 3 months

Software Engineer
February 2019 - September 2019 (8 months)
Surabaya, East Java, Indonesia

- Enhanced the application’s data processing speed by 40% through optimized algorithms and database indexing.
- Developed and deployed a caching mechanism, reducing server load and improving response times by 50%.
- Developed and maintained backend services for an education application using Liferay and Java.
- Designed and implemented RESTful APIs, ensuring secure and efficient communication between frontend and backend.
- Managed database operations, including schema design, indexing, and query optimization.
- Collaborated with cross-functional teams to define project requirements and deliver high-quality software solutions.
- Conducted performance tuning and troubleshooting to enhance application reliability and scalability.

Frontend Developer
July 2018 - January 2019 (7 months)
Surabaya, East Java, Indonesia

- Grow the user base from zero to over 150,000 users
- Improved web application performance by 20% by optimizing code and implementing asynchronous loading techniques.
- Collaborated with the UI/UX team to design and implement a responsive user interface, increasing user satisfaction by 15%.

- Enhanced SEO performance, resulting in a 30% increase in organic search traffic

Trikarya Teknologi Indonesia
11 months

Web Developer
December 2017 - June 2018 (7 months)

Internship
August 2017 - November 2017 (4 months)

Institut Teknologi Sepuluh Nopember Surabaya
Teaching Assistant
July 2016 - May 2017 (11 months)
Surabaya, East Java, Indonesia

- Computer Network (2017/2018)
- Operating System (2016/2017)

Education

Institut Teknologi Sepuluh Nopember (ITS)
Bachelor's Degree, Informatics · (2014 - 2018)

SMA Negeri 1 Mataram
High School, Natural Sciences · (2011 - 2014)
