PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building high-performance web, mobile, and backend systems, with practical background in AI/ML workflows. Proven track record building real-time mission-critical dashboards for NTMC Korlantas Polri (< 500ms streaming latency), optimizing native Android applications for 1.5M+ active users (38.6% size reduction, 99.42% crash-free rate), and integrating AI-powered features including conversational agents and knowledge base pipelines. Proficient in Python, SQL, Docker, Linux, and Git, with certifications in Machine Learning and Data Analysis from Dicoding Indonesia.

WORK EXPERIENCE

Full Stack Developer (Web3 & AI) | Kipley Pte. Ltd. (Singapore (Remote)) *Nov 2024 – Jul 2025*

- Engineered and orchestrated high-throughput **REST & GraphQL APIs** across 5+ flagship dApps, boosting frontend response speeds by **30%** through optimized caching layers.
- Architected seamless **Ethereum Smart Contract (Solidity)** integrations with **Next.js 15 (App Router, Turbopack)** frontends via **Wagmi v2** and **Ethers.js v6** for secure DeFi/NFT transactions.
- Developed an autonomous **Telegram AI Assistant** supporting multi-chain settlement (**TON, USDT, Telegram Stars**) and fiat on-ramp integrations with **100% zero-failure transaction reliability**.
- Championed Agile sprint execution, collaborating cross-functionally with UI/UX and product teams to deliver feature releases on schedule.

Freelance Software Engineer | PT Lapantiga Solusi Algoritma (Surabaya, Indonesia) *Jan 2019 – Present*

- Architected and deployed the **NTMC Command Center Dashboard Utama**, an operational traffic & incident monitoring platform utilizing **React 19**, **React Router v7**, **TypeScript**, **Tailwind CSS v4**, and **shadcn/ui**.
- Spearheaded real-time bidirectional streaming via **Pusher WebSockets**, achieving **< 500ms incident broadcast latency** and instant multi-screen telemetry synchronization.
- Engineered high-performance server-side data tables with **TanStack Table v8** and server-state caching via **TanStack Query v5**, supporting complex multi-field filtering across large datasets.
- Designed 100% type-safe form workflows using **React Hook Form** with strict **Zod** schema validation and interactive visualization charts via **Recharts**.
- Delivered robust enterprise backends, virtual exhibition platforms (**Efosh**), tax e-Bupot systems, and **Petrokimia Gresik** insurance claim portals leveraging **Laravel 12/10**, **Livewire**, **AWS S3**, and **MySQL**.

Software Developer | PT Aku Pintar Indonesia (Surabaya, Indonesia) *Feb 2021 – May 2024*

- Spearheaded native **Android (Kotlin & Java)** development for a flagship EdTech platform serving **1,500,000+ active users** with a **4.42/5.00 Google Play Store rating**.
- Architected a modular **Clean Architecture & MVVM** refactor using **Android Jetpack**, shrinking application size by **38.6%** (**69.5 MB to 42.7 MB**) and boosting runtime rendering performance.
- Optimized core background sync and memory allocation to sustain a **99.42%+ crash-free session rate** across continuous 90-day production release cycles.
- Maintained enterprise **Liferay OSGi web portal modules** (100+ micro-modules), integrating national **RIASEC psychometric testing**, **WebRTC live video counseling**, and automated payment gateways (**BCA, OVO**).

Software Developer | PT Qira Teknologi Indonesia (Surabaya, Indonesia) *Nov 2020 – Jan 2024*

- Architected scalable web backends for **Kemdikbudristek RI (EPAK Widyaprada)** national civil servant credit scoring, automotive e-commerce, and CRM platforms using **PHP Laravel**, **MySQL**, and **AWS S3**.
- Engineered secure payment gateway integrations (**Midtrans Snap**, **Moota**) and Google APIs, guaranteeing **99.9% billing transaction accuracy** and automated reconciliation.
- Developed companion native Android applications utilizing **Kotlin**, **Android Jetpack**, and **Firebase** for real-time data synchronization.
- Configured CI/CD deployment pipelines on **Linux/SSH**, **cPanel**, and **Plesk**, ensuring high availability and zero-downtime production rollouts.

TECHNICAL SKILLS

Deep Learning & Computer Vision: TensorFlow (2.15+), Keras 3, Convolutional Neural Networks (CNN), OpenCV, ImageDataGenerator, Image Augmentation (Pillow/PIL), Callbacks (EarlyStopping, ModelCheckpoint), .keras Model Serialization & CLI Inference

Machine Learning & Predictive Modeling: Scikit-Learn, Supervised Learning (Decision Tree, SVM/SVC, SVR, Logistic & Linear Regression), Unsupervised Learning (K-Means Clustering, Elbow Method), PCA (Dimensionality Reduction), Hyperparameter Tuning (GridSearchCV), K-Fold Cross-Validation

Data Science, Statistics & Visualization: Python (Pandas, NumPy, SciPy), Descriptive Statistics & Outlier Detection (IQR, Skewness, Variance), Data Wrangling & Feature Engineering, Matplotlib, Seaborn, Interactive Dashboards (Streamlit, Recharts), Jupyter Notebook, Google Colab

Cloud & Production Environments: Alibaba Cloud (Certified Developer), Google Cloud Platform (GCE, Cloud Storage), Docker, Linux/SSH, Git / GitHub Actions, RESTful & GraphQL APIs, SQL (PostgreSQL, MySQL)

Edge & Systems Integration: Mobile Edge Inference (Android Jetpack, Kotlin/Java), Room SQLite, Offline-first Caching, Real-Time WebSockets (Pusher JS), Live Operational Dashboard Integration

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) | Bachelor of Computer Science (S.Kom.) in Informatics Engineering *Jul 2014 – Aug 2018*

GPA: 3.42 / 4.00 | Focus Area: Network Centric Computing & Distributed Systems

CERTIFICATIONS

Alibaba Cloud Certified Developer | Alibaba Cloud *Jul 2023 – Jul 2026*

Core Focus: Cloud Architecture, Cloud Application Development, Container & Compute Services, Scalable Deployment

Belajar Machine Learning untuk Pemula | Dicoding Indonesia / Google Developers *Aug 2024 – Aug 2027*

Core Focus: Supervised & Unsupervised Learning, SVM, Neural Networks, CNN Image Classification, TensorFlow

Belajar Dasar AI | Dicoding Indonesia / Google Cloud Partner *Aug 2024 – Aug 2027*

Core Focus: Artificial Intelligence Fundamentals, Machine Learning Concepts, Deep Learning Principles

Belajar Analisis Data dengan Python | Dicoding Indonesia / Google Developers *Jan 2024 – Jan 2027*

Core Focus: Descriptive Statistics, Data Wrangling, Exploratory Data Analysis (EDA), Data Visualization, Streamlit

Belajar Dasar Google Cloud | Dicoding Indonesia / Google Cloud Partner *Aug 2024 – Aug 2027*

Core Focus: Google Cloud Platform (GCP), Compute Engine, Cloud Storage, VPC, Cloud IAM & Security

LANGUAGES

Indonesian: Native proficiency **English:** Professional working proficiency
