SUMMARY

Bachelor of Computer Science with over 6 years of experience in software development, covering both Web 2 and Web 3 technologies. Skilled in building web applications using Laravel (PHP), JavaScript, and React.js, with hands-on experience integrating systems with Google API, Midtrans, and Moota. Experienced in developing native Android applications using Java, Kotlin, and Android Jetpack. Proficient in building decentralized applications (dApps) and integrating Ethereum smart contracts (Solidity). Comfortable working in agile/SCRUM teams, delivering efficient, stable, and scalable solutions.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) | Informatics Engineering | GPA: 3.42/4.00 *Jul 2014 - Aug 2018*
Area of Interest: Network Centric Computing

EXPERIENCE

Frontend Engineer | Eigenform Pte. Ltd. *Nov 2024 – July 2025*

- Built and integrated APIs for 5+ Eigenform projects, significantly improving frontend responsiveness and overall user experience by optimizing data flow and component rendering.
- Integrated Ethereum smart contracts (Solidity) with web3 frontend frameworks, enabling secure and seamless decentralized transactions for DeFi and NFT features.
- Developed a Telegram-based AI Assistant with multichain payment support (TON, USDT, Stars), enabling real-time user interaction and crypto-based transactions.
- Scaled the system to support over 1 million users, achieving 99.5% transaction success rate across 10,000+ monthly transactions with minimal downtime.
- Collaborated closely with product, design, and backend teams in an Agile environment to iterate on features, resolve technical blockers, and meet sprint deadlines consistently.

Android Developer | PT Aku Pintar Indonesia *Feb 2021 – May 2024*

- Developed an Android-based online education application with a total user base of 1.5 million and a Play Store rating of 4.42, highlighting user satisfaction and widespread adoption.
- Designed a modular architecture for the native Android application, reducing the application size by 38.6%, from 69.5 MB to 42.7 MB, thereby improving performance and user experience.
- Optimized and maintained the application to minimize bugs and errors, achieving a crash-free user rate of over 99.42% for the past 90 days, ensuring reliability and stability.
- Conducted daily standups twice a week and consistently met sprint deadlines for project delivery, demonstrating strong project management and teamwork skills.

Software Developer | PT Qira Teknologi Indonesia *Nov 2020 - Jan 2024*

- Developed web-based back-end applications such as online assessments, online stores, Customer Relationship Management (CRM) systems, and Content Management Systems (CMS), utilizing technologies like PHP, Laravel, Vanilla JS, Google API, MySQL, and integrating payment gateways such as Midtrans and Moota for efficient transaction processing.
- Engineered front-end Android applications employing technologies like Java, Kotlin, Android Studio, Firebase, and Android Jetpack, ensuring robust functionality and an intuitive user experience.

- Executed the deployment of applications to both dedicated and virtual servers using tools such as cPanel, Plesk, and SSH, ensuring seamless integration and operation.
- Optimized and maintained existing applications to eliminate bugs and errors, ensuring high performance and reliability.

Software Developer | PT Lapantiga Solusi Algoritma

Jan 2019 - Feb 2024

- Developed web-based back-end applications, including online stores, virtual event platforms, and Content Management Systems (CMS), leveraging technologies such as PHP, Laravel, Vanilla JS, Google API, MySQL, MongoDB, and integrating payment gateways like Midtrans and Moota to facilitate seamless transactions.
- Engineered front-end Android applications using robust technologies including Java, Kotlin, Android Studio, Firebase, and Android Jetpack, ensuring high performance and user-friendly interfaces.
- Authored comprehensive code documentation and technical user guides to enhance maintainability and ease of use, facilitating efficient onboarding and knowledge transfer for development teams.
- Demonstrated strong project management skills by consistently meeting sprint deadlines and delivering projects on time, contributing to overall project success and client satisfaction.

CERTIFICATION

Belajar Fundamental Aplikasi Web dengan React | Dicoding Indonesia

Apr 2024 - Apr 2027

- [Personal notes spa](#) : Simple notes application built using React.js, Tailwind CSS, and Vite.

Belajar Analisis Data dengan Python | Dicoding Indonesia

Jan 2024 - Jan 2027

- [Bike Sharing](#) : Simple data analysis project using a bike sharing dataset.

Menjadi Android Developer Expert | Dicoding Indonesia

Jan 2021 - Jan 2024

- [Capstone](#) : Crafting a movie catalogue app with a robust MVVM design pattern following clean architecture principles, fortified by a sophisticated security framework encompassing encryption, obfuscation techniques, and stringent certificate pinning.

Belajar Android Jetpack Pro | Dicoding Indonesia

Dec 2020 - Dec 2023

- [Movie Catalog](#) : Developing a refined movie catalogue application with a streamlined MVVM design pattern and Android Architecture Components methodology. Employing SQLite alongside the robust Room library for efficient data storage and management.

SKILLS

Programming Languages : PHP, HTML, CSS, Java, Kotlin, JavaScript, TypeScript, Python, SQL.

Frameworks & Libraries : TON SDK, Smart contract, Telegram SDK, Laravel, Next.js, Node.js, React.js, Redux, Liferay, RESTful API, Bootstrap, SASS/SCSS, Tailwind CSS, Firebase, Android Jetpack, Apache HTTP Server. Google API

Databases : MySQL, PostgreSQL, MongoDB, Oracle, Prisma ORM, Drizzle ORM.

Tools & Technologies : Git, SSH, Vercel, Plesk, cPanel, Figma, Zeplin, Jira, Slack, VS Code, Android Studio, Gradle, Clerk, Sentry.

Additional Skills : Unit Testing, Problem Solving, Critical Thinking, Teamwork, Payment Gateway Integration, Agile/Scrum methodologies.

LANGUAGES

- **Indonesia** – Native
- **English** – Intermediate
