PROFESSIONAL SUMMARY

Results-driven Software Engineer with over 6 years of experience architecting and delivering scalable Web2 and Web3 applications. Proven frontend & full-stack expertise across modern technologies including React 19, React Router v7, TypeScript, Tailwind CSS v4, shadcn/ui, TanStack Query/Table, Laravel, native Android (Kotlin, Jetpack), and decentralized solutions (Solidity, TON SDK). Demonstrated track record building real-time operational traffic monitoring dashboards (NTMC), optimizing flagship mobile apps serving 1.5M+ users (38.6% size reduction, 99.42% crash-free stability), and developing high-concurrency Telegram AI assistants with crypto payments. Adept in Agile leadership, type-safe clean architecture, and cross-functional team collaboration.

WORK EXPERIENCE

Freelance Software Engineer | PT Lapantiga Solusi Algoritma (Surabaya, Indonesia)

Jan 2019 – Present

- Developed the NTMC Dashboard Utama, a mission-critical operational and traffic monitoring web application leveraging React 19, React Router v7, TypeScript, Tailwind CSS v4, and shadcn/ui.
- Integrated real-time WebSocket communication using Pusher JS for live incident streaming, instant operational alerts, and dynamic dashboard event updates.
- Architected high-performance server-side data tables with TanStack Table v8 and server state caching via TanStack Query v5, supporting complex multi-field filtering, sorting, and pagination across large datasets.
- Engineered robust type-safe forms with React Hook Form and Zod schema validation, along with interactive data analytics charts using Recharts.
- Previously built backend architectures, virtual event platforms, and CMS solutions using Laravel, Node.js, MySQL, and MongoDB, delivering high-concurrency client solutions on schedule.

Full Stack Developer (Web3 & AI) | Kipley Pte. Ltd. (Singapore (Remote))

Nov 2024 – Jul 2025

- Built and integrated high-performance REST and GraphQL APIs for 5+ Kipley projects, improving frontend response times by 30% through optimized caching and state management.
- Integrated Ethereum smart contracts (Solidity) with Web3 frontend architectures (Next.js, Ethers.js/Wagmi), facilitating secure decentralized transactions for DeFi and NFT features.
- Developed a high-concurrency Telegram AI Assistant supporting multichain transactions (TON, USDT, Telegram Stars), enabling real-time user interaction and automated crypto payments.
- Collaborated closely with product, UI/UX, and backend teams in an Agile environment to iterate on features, resolve technical blockers, and meet sprint deadlines consistently.

Android Developer | PT Aku Pintar Indonesia (Surabaya, Indonesia)

Feb 2021 – May 2024

- Spearheaded native Android development for a flagship education platform with 1.5M+ active users and a 4.42/5.00 Play Store rating.
- Architected and refactored the app into a modular MVVM structure using Android Jetpack, reducing the application size by 38.6% (from 69.5 MB to 42.7 MB) and boosting runtime performance.
- Optimized and maintained core application modules to achieve a 99.42%+ crash-free user rate over continuous 90-day release cycles.
- Facilitated bi-weekly agile standups and sprint planning, collaborating cross-functionally to deliver feature releases on schedule.

Software Developer | PT Qira Teknologi Indonesia (Surabaya, Indonesia)

Nov 2020 – Jan 2024

- Developed secure, scalable web-based back-end systems (online assessments, e-commerce, CRM, and CMS) utilizing PHP, Laravel, MySQL, and RESTful APIs.
- Integrated end-to-end payment gateway workflows (Midtrans, Moota) and Google API services, ensuring 99.9% billing transaction accuracy and seamless automated reconciliation.
- Engineered companion native Android applications utilizing Java, Kotlin, Android Jetpack, and Firebase for real-time synchronization and intuitive user experiences.
- Configured deployment pipelines and server environments across Linux/SSH, cPanel, and Plesk, ensuring high availability and zero-downtime releases.

TECHNICAL SKILLS

Frontend & Mobile: React 19, React Router v7, TypeScript, Tailwind CSS v4, shadcn/ui, TanStack Query/Table, Next.js, Redux, Android Jetpack (Kotlin/Java), Vite, Bun

Backend & Web3: Laravel (PHP), Node.js, RESTful APIs, GraphQL, TON SDK, Smart Contracts (Solidity), Telegram Bot API, Pusher JS (WebSockets)

Programming Languages: TypeScript, JavaScript, PHP, Kotlin, Java, Solidity, Python, SQL, HTML5, CSS3

Databases & ORMs: MySQL, PostgreSQL, MongoDB, Prisma ORM, Drizzle ORM, Room Database

DevOps & Tools: Git, Docker, Linux/SSH, Vercel, Firebase, Plesk, cPanel, Jira, Slack, VS Code, Android Studio, Sentry, Figma, Recharts, Zod

Core Competencies: Real-time WebSocket Streaming, Type-safe Clean Architecture, MVVM, Payment Gateway Integration, Agile/Scrum Methodologies

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) | Bachelor of Computer Science (S.Kom.) in Informatics Engineering Jul 2014 – Aug 2018

GPA: 3.42 / 4.00 | Focus Area: Network Centric Computing & Distributed Systems

CERTIFICATIONS

Belajar Fundamental Aplikasi Web dengan React | Dicoding Indonesia Apr 2024 – Apr 2027
Core Focus: Single Page Application (SPA), React.js, Tailwind CSS, Vite

Belajar Analisis Data dengan Python | Dicoding Indonesia Jan 2024 – Jan 2027
Core Focus: Data Wrangling, Exploratory Data Analysis, Visualization

Menjadi Android Developer Expert (MADE) | Dicoding Indonesia Jan 2021 – Jan 2024
Core Focus: Clean Architecture, MVVM Design Pattern, Room Database, App Security & Certificate Pinning

Belajar Android Jetpack Pro | Dicoding Indonesia Dec 2020 – Dec 2023
Core Focus: Android Architecture Components, LiveData, ViewModel, Room Library

LANGUAGES

Indonesian: Native proficiency **English:** Professional working proficiency
